

## 2015 Annual Report

**SCHOODIC**  
INSTITUTE  
AT ACADIA NATIONAL PARK

*Cover photo and sketches from the field by Melissa Fischer, Artist-in-Residence, Acadia National Park 2015.*

*"I lifted my binoculars for a closer look—an otter swimming through the cove! Soon it was joined by three more, and I watched as they undulated up and down, sometimes diving, sometimes seeming to just enjoy up and down motion, as they curved in and out of the surface of the water without going deeper." [www.melissafischer.com](http://www.melissafischer.com)*

## Message from the Chairman and President

Dear Friends,

We are extremely grateful for your support and pleased to share our 2015 Annual report with you.

Schoodic Institute continues to build on the foundation and vision created as the Navy departed Winter Harbor. At the outset of 2016, Acadia's Centennial and the Centennial of the National Park Service, we are playing a vital role for Acadia's success in the next century.

The Institute is dedicated to advancing ecosystem science and life-long learning, and 2015 was a banner year. As our partnership with the National Park Service is bearing fruit, this was the third year in a row of record numbers of research projects (88) conducted in Acadia. The Park is becoming known as an extraordinary research destination. Many of these investigations engage the public, and will inform future stewardship of Acadia's resources.

Throughout this report you will also find highlights of important programs that reach students and learners of all ages with the kinds of experiences that can transform lives - through an appreciation of the natural world, or through a new belief in oneself and motivation to pursue change.

Our efforts also reach far beyond Acadia - with collaborations throughout the Downeast region, statewide, within the National Park system across the country, and internationally.

Thanks to you, Acadia and Schoodic Institute, working together; have truly enormous potential.

Sincerely,

Alan Goldstein

Chairman

Mark Berry

President & CEO

*"The topographic configuration, the geology, the fauna and the flora [...] are of great scientific interest."  
- Woodrow Wilson, proclamation of Sieur de Monts National Monument, July 8, 1916*

*"For it is a project that contemplates far more than its mere gift of land, important though that be.  
To Natural Science this gift, carried to its completion according to the plans now made, should prove inestimable."  
- Dr. Alfred G. Mayer, Director of the Department of Marine Biology at the Carnegie Institution of Washington,  
dedication ceremony for Sieur de Monts National Monument, 1916*

## Dedicated to Advancing Ecosystem Science and Life-long Learning:

Schoodic Institute at Acadia National Park helps the National Park Service achieve the original vision for Acadia as a destination for science and inspiration.

Through innovative programs and partnerships, the nonprofit Institute is a national and community catalyst and center for research and learning.

The Institute enriches the experiences of residents and visitors to the Acadia region and builds understanding and appreciation for the complexity of the natural world.

Engaging the public in science is rapidly advancing research and offers hope as we face complex challenges in a changing environment.

Schoodic Institute at Acadia National Park is a 501c3 nonprofit organization. We are particularly grateful to work in close partnership with the National Park Service and a wide range of other organizations.

# 2015 ANNUAL HIGHLIGHTS

## Ecosystem Science:

### Facilitating and Developing Research Activities

- Facilitated permits for 88 Acadia National Park research projects. This was the third straight year of setting new records for the amount of research activity in Acadia.
- Expanded fall migration monitoring, studying raptors, seabirds, and songbirds through our bird ecology program.
- Acquired a sophisticated sensor for continuous monitoring of ocean pH, temperature, and chemistry (which will be deployed in spring 2016).
- Collaborated to bring citizen science datasets together and create visualizations to aid researchers, educators, and resource managers.
- Hosted the 25th Annual North American Dendroecological Fieldweek with 60 researchers and students.
- Hosted an international conference of oceanographers that study dynamics of ocean currents.
- Began collaborating with other field stations to develop common approaches to science at the scale of the Gulf of Maine.

Photo by Holland Haverkamp, University of Maine

## Citizen Science – Engaging the Public in Research

- Citizen Science projects hosted by Schoodic Institute in 2015 included SeaWatch at Schoodic Point, HawkWatch on Cadillac Mountain, morning bird migration monitoring at Frazer Point, and projects monitoring phenological (or seasonal timing) changes in the intertidal zone and in upland habitats.
- Facilitated Acadia's 13th annual BioBlitz: 55 participants collected over 1,000 specimens of 300\* species of wasps, bees, and ants (\*taxonomists are still completing identifications, the final species count is pending their results).
- Led teams of teen and adult science volunteers from EarthWatch over 42 days, advancing research on ocean acidification and phenology.
- Developed training videos for the Dragonfly Mercury project, now underway at 50 national parks, and developed an online training course for teams seeking to develop or improve citizen science programs.
- Helped launch the new international Citizen Science Association: 650 people from 23 countries attended its first conference.

## Connecting Science, Conservation, and Resource Stewardship

- Hosted the Acadia National Park Science Symposium.
- Contributed to leadership of the Down East Research and Education Network and hosted its Convergence Conference.
- Hosted a three day climate change scenario planning workshop with Acadia National Park.
- Hosted a two-day conference of the Northeast Region Migration Monitoring Network.

# Life-long Learning:

## Reaching Students

- Partnered with Acadia to offer the three-day Schoodic Education Adventure to over 800 students. In 2015, 22 Maine schools participated, along with three out-of-state schools.
- Continued the Acadia Learning snowpack project, bringing science into classrooms and students into the outdoors, with students of 18 teachers from 13 Maine schools collecting snow data and investigating effects of climate change on snowpack, hydrology, and aquatic habitats.
- Hosted OceansWide Marine Science Camps and provided scholarships to local students.

## Supporting Teachers and Advancing Education

- Led teacher professional development workshops and courses, including Advanced Placement Summer Institutes open to middle and high school teachers who teach advanced placement or pre-advanced placement courses, and partnered with Princeton University's QUEST program for science teachers.
- Completed five years of data collection on the Maine Physical Sciences Partnership aimed at improving grade 6-9 science teaching across Maine.
- Assisted individual school districts with curriculum development and to help teachers make more productive use of student assessment data as Maine schools transition to assessment of student proficiency relative to state learning standards.
- Began evaluating a program to improve science teaching in 1,000 Pre-K – 5 classrooms.
- Participated in the Environmental Living and Learning for Maine Students (ELLMS) collaborative, including hosting an educator summit. ELLMS was honored with an EPA Environmental Merit Award.

"I can't tell you how many [...] connections my students are making to what they learned during their time with you in Acadia.

It is beyond heartwarming for me to hear kids [...] perfectly explain the schedule of the tides, or rock formations, or animal adaptations, etc... It happens ALL the TIME, and every time I have to keep myself from crying because what you helped put in place for these kids is phenomenal.

There are a small group of kids that I honestly feel are different people since that visit."

*-teacher participant, Schoodic Education Adventure*

## Life-long Learning

- Piloted the Schoodic Winter Festival and began planning the 2016 Acadia Winter Festival.
- Led 5 multi-day birding ecotours, with a citizen science component, in partnership with the Maine Birding Trail.
- Partnered to offer family activities such as spring Junior Ranger Day and International Migratory Bird Day, and fall Week of Ecology.
- Invited guests on a benefit cruise sponsored by Bar Harbor Whale Watch.
- Offered public seminars, discussions, and brown bag lunches by notable authors and experts.
- Hosted a variety of university courses, local and regional education programs, and nonprofit meetings, all contributing to an increase in activity on campus.
- Joined in celebrating the opening of the new Schoodic Woods trails and campground.

## Inspiration Through Art

- Hosted 17 Acadia Artists-in-Residence.
- Hosted art exhibits, workshops, and retreats ranging from one-on-one instruction to a retreat for 100 plein air painters.

## Schoodic Marine Center

In late 2015 Schoodic Institute created a new entity, Schoodic Marine Center, and secured a long-term lease of the Winter Harbor Marina. The goal is to keep the property available for access to and from the ocean for research, education, transportation, and other community uses. The Schoodic Marine Center planning process will involve seeking input and engagement from community members in 2016. Visitors in 2016 should see modest site improvements, a small exhibit area, two operating ferry services between Winter Harbor and Bar Harbor, increased Island Explorer bus services (Memorial Day to Columbus Day, on a 30 minute interval in the summer) and bike rentals available on site.

## 2015 Financial Summary:

Statement of Financial Position:	December 31, 2015	2014
ASSETS		
Cash and cash equivalents	\$ 704,265	\$ 547,692
Accounts receivable	\$ 121,177	\$ 57,966
Pledges receivable	\$ 314,000	\$ 50,000
Property and equipment, net	\$ 566,797	\$ 594,649
Deposit	\$ 47,500	-
Other current assets	\$ 233	\$ 1,895
TOTAL ASSETS	\$1,753,972	\$1,252,202
LIABILITIES AND NET ASSETS		
Current Liabilities		
Accounts payable	\$ 4,956	\$ 2,199
Deferred revenue	\$ 41,921	\$ 6,536
Accrued payroll and related expenses	\$ 10,876	\$ 5,786
Total Liabilities	\$ 57,753	\$ 14,521
Net Assets:		
Unrestricted	\$1,018,477	\$ 924,650
Temporary restricted	\$ 677,742	\$ 313,031
Total Net Assets	\$1,696,219	\$1,237,681
TOTAL LIABILITIES AND NET ASSETS	\$1,753,972	\$1,252,202

"The Institute is a wonderful place [...] to gain a better understanding of nature and its value to all of us.  
And, we learned that the Institute provides opportunities for valuable research. Awesome!

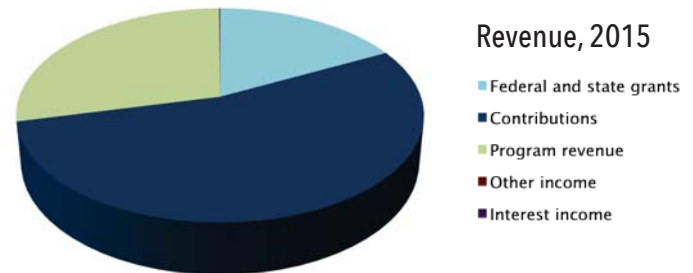

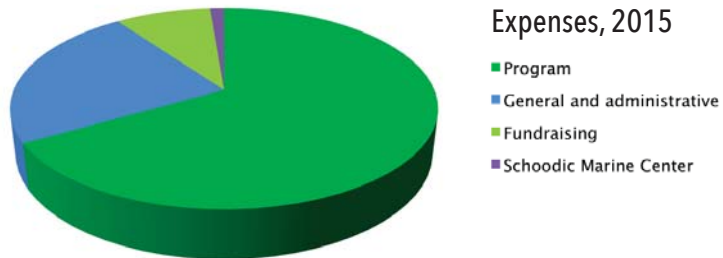

During the Winter Festival we attended sessions with several of your staff and were very favorably impressed with their knowledge  
and the ability to transmit that knowledge to us who are not scientists or skilled outdoors people.

We will be watching for upcoming activities and look forward to being with you again."

- Winter Festival participant

## Statement of Activities For The Year Ended December 31, 2015

	Unrestricted	Temporarily Restricted	2015 Total	2014 Total
Revenue:				
Federal and state grants	\$ 406,168	-	\$ 406,168	\$ 317,963
Contributions	\$ 510,320	\$ 741,353	\$1,251,673	\$ 930,830
Program revenue	\$ 664,632	-	\$ 664,632	\$ 488,197
Other income	\$ 456	-	\$ 456	\$ 11
Interest income	\$ 1,747	-	\$ 1,747	\$ 1,226
Assets released from restrictions	\$ 376,642	(\$376,642)	-	-
